## Abstract

**Educoin is a decentralized learning platform for people to improve their skills in real world future technologies. Educoin is building the decentralized online education and professional development platform for the future. The main participants in the Educoin network are Course creators (Mentors), Learners, moderators, API developers, colleges, schools, libraries, businesses and third-party online education companies and charity organization. We are an existing business since 2015, with team members from Strong blockchain technology, Coaching, Marketing and Education background. Educoin is building the world's largest online effective skill based learning in the blockchain network for the future. Our network will ready for all content creator in 2019. We aim to develop a decentralized online learning network that is not reliant on learning theory, but practical real world skills by having real live online mentor that have walked the talk. Course creators create educational course and courses can be sold for Educoin. With the decentralized blockchain payment method of Educoin saving all parties payment transfer fees from banks/Master/Visa and forex rates. In this paper we explain the token mechanics for the blockchain EDU smart contract tokens and how we intend to fully integrate EDU into the whole product, internal and external ecosystem. With EDUCOIN and our learning portal we bridge the gap for a truly global worldwide certification and skill upgrade without barrier and creating opportunity for the unbanked part of the world to receive world class education creating lasting positive social impact on a global scale.**

## Executive summary

**Educoin is a decentralized online skills learning platform for learners to improve their professional skills in future technologies. Educoin is building the future for online education and professional development with blockchain technology. We are creating an online Learning platform integrated with EduCoin to cut out the traditional payment method that usually have high exchange/transfer fee. And also to reach people in the world that do not have access to conventional payment method but do have crypto wallets. We aim to create financial benefits to the whole crypto and education ecosystem in the world now. By realizing a revenue generation model for long term project success by sharing percentage for the courses sold on the learning platform with course creator. Creating real utility for the token and raising demand of token steadily to achieve optimize price on the coin exchanges through effective use to the fund raised for awareness and marketing of the platform. The only way anyone can use the platform will be by utilizing EduCoins creating real use of the token.**

**The Educoin ecosystem consists of learners, individual course creator, education companies, schools, charity organization, businesses, token holder and exchanges. Our Strong leaders include technology company CEO and experience team lead in the learning-industry. By building our blockchain with smart contract technology on top of an existing blockchain, namely Ethereum, using ERC20 tokenization mechanics it immediately Increases stability as the network for mining transaction is already established for fast transaction.**

## Educoin Ecosystem

**The only currency accepted for use on our online learning portal will be Educoin. We aim to be always raising the demand steadily over time.**

**Demand from Seminar/Coaching business- to list their e course on the platform to achieve exposure to the 306.9 billion dollars professional development market and increase their revenue.**

**Learners - from across the globe in both banked and unbanked part of the world can all access to the learning portal for skills upgrade to improve their lives with better income opportunity. This also create a clear edge over competitors only dealing with Fiat currency.**

**Individual course creator- will be able to open up their courses worldwide to increase revenue and exposure.**

**School/college/University- can offer their professional development program to be completed online from student all across the globe with student not needing to spend on air ticket, lodging, agent fees and no barrier of pass approval anyone with an internet connection and a cellphone will be able to access to world-class education.**

**Our token is ERC20 compliant and can be easily integrated to most exchanges around the world for easy transaction and converting between both crypto and fiat currency.**

**Charitable organization and mission group looking to introduce education, skill and knowledge upgrade to help the disadvantage part of the world can now do so with our learning platform with ease. Creator of educoin also aim to have regular campaign to raise fund in educoin to help children of disadvantage background in different part of the world to afford education. This movement also benefit token holder as the same budget is to be spend on marketing. Might as well impact the world for the better along the way.**

## Safe Usage

Securing our Token and Sensitive data disseminated over the blockchain is the most important need. We are making three stage security reviews. Initial step is nitty gritty inner test for data security vulnerabilities like bugs, Ponzi plans, control of brilliant contract result and so forth. The second step is to test each new form. What's more, overhauls of the agreements over test arrange to counsel with private as of now propelled effective ICOs.

We realize that engineers of savvy contracts must be much security centered than their conventional programming partners. Over the blockchain the plan and programming ideal models advanced exponentially. Not at all like conventional programming lifecycle, where adaptation redesigns are the standard, shrewd contracts are changeless once conveyed. Savvy contract engineering must be profoundly secluded predicting future changes, assuming any, can be separated into little regions.

We emphatically trust that bringing issues to light and obligation on keen contract security are both basic strides in starting to assemble a strong protection against future assaults.
